

I have a **doctor's appointment** at the
Advantage Care Health Center in **Brookville**

I can bring something from home to entertain myself in case I need to wait.

I will travel to the Advantage Care Health Center with a family member or staff person.

We will park our car or van in the parking lot.

We will exit our vehicle and walk towards the front door. We will then put on our face masks

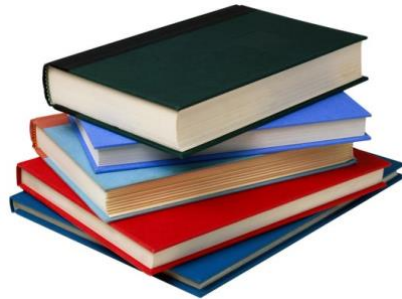

When we approach the door, we push a special button which will unlock the door.

We will then pull open the front door and walk to a second door which has another special button. We will push this button and the door will open.

I will then walk to the front desk and tell them my name.

I may need to wait for a doctor or nurse to call me so I can sit in the waiting room. I can watch the TV or use the entertainment I brought with me.

A nurse or doctor will call my name, I will then leave the waiting room and follow the doctor or nurse through the door into the hallway.

I will walk down the hallway with the doctor or nurse into the exam room where I will have my appointment.

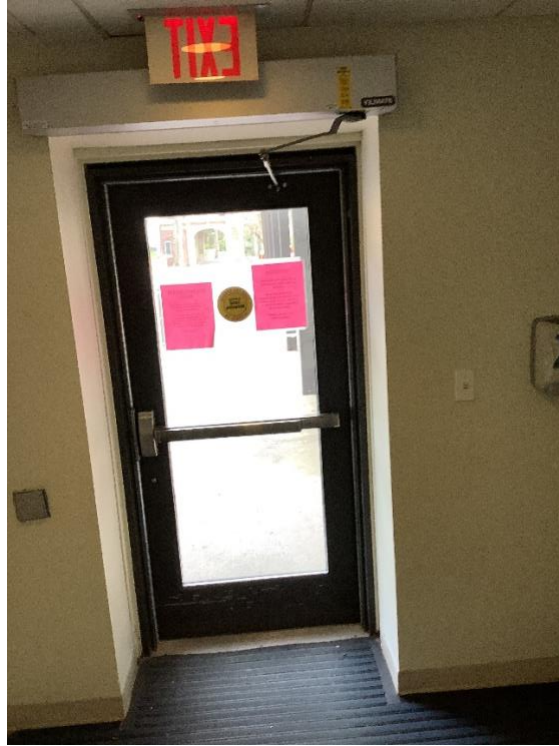

I will be seen by the Doctor in the exam room.

Once my exam is finished, I will follow my family or staff through the hallway and back into the waiting room.

I may need to wait for my family or staff to fill out paperwork at the exit window. We will schedule my next appointment.

I will then push open the doors and walk out of the Advantage Care Health Center.

When I leave the building, I will remove my facemask and walk with my family or staff back to the parking lot

I will then enter my van or car and leave the Advantage Care Health Center.

SUCCESS!!!
